FormEvo.co.uk
Evolutionary Legal & Professional Forms

The Legal Forms Specialist

Benefits

FormEvo is a cloud-based Forms Library that replaces the traditional on-premise forms applications which rely on your IT Department or users to download software and content updates.

FormEvo provides you with cloud-based access to the only vendor-independent, comprehensive and secure, electronic and digital legal forms library in the UK. The UK Government's "Digital by Default" service standard is integral to our service, smoothing the transition from paper to electronic to digital forms and future-proofing your firm as we are propelled towards digital e-submission.

Legal forms are our only business – it's what we do – so our research and development is totally focused on developing electronic and digital legal forms that are easy to use, innovative, flexible and help you complete forms faster.

Today's key requirements around collaboration, client experience, data security, adaptable third-party integrations and return on investment (ROI) are all achieved within FormEvo and its comprehensive API. This, combined with transparent, consistent and fair pricing based on your actual "form or user" usage, makes FormEvo the only forms solution you'll need to support your firm now and into the future.

FormEvo has over 400 clients across the UK – more than twenty in the Top 200 – and has enabled five million+ digital forms e-submissions since 2007.

The core benefits of the standard edition of FormEvo include:

User or form centric pricing

- Transparent and consistent price policy across all FormEvo customers
- Standard forms based on active users per month, or forms used
- Digital submissions are charged on a per transaction basis
- Cost aligned with your firm's ROI

Form bundling

- Work on multiple forms
- Add in guidance notes and other documents
- Data transfer between forms
- Save, send and print one file
- eSign several places, but all in one 'envelope'

Form expandability

- Duplicating pages
- Expandable text boxes
- Adding rows to tables in schedules
- Expanding rows retain auto calculate function
- Attestation clauses can be edited

Digital submissions

- Send forms digitally from within FormEvo
- Receive a faster response
- Validation functionality limits the chance of a form being rejected
- Lower the cost of submitting forms
- Copy data from one Government Gateway to another

Cloud-based forms library

- Share forms digitally
- Collaborate with colleagues, clients and the 'other side'
- Form audit trail
- Creates a paper-light process

Form collaboration

- Over 2000 legal forms
- Enables remote working
- Reduced demand on your IT department
- Instantaneous forms updates/developments
- 2FA + eSign (PAYG £2.50) per matter

GDPR/Cyber compliance

- Full audit trail on all forms
- GDPR Toolkit to identify and delete client based personal data
- Ability to mark forms as private to limit who can view a form within a practice

Automation

- Financial calculations and figures work between forms
- Practice and Court details pre-population
- Commonly used clauses, covenants and other wording enabled
- Attestation clauses to select from
- Cutting down data input time by auto-transferring data between linked forms
